

Cyber Missions Unit (Provisional)

“Many of our adversaries lack the ability to confront our forces physically, choosing instead to employ virtual weapons with potentially devastating effect. We must take full advantage of these technologies, building our own capabilities to operate in cyberspace with the same level of skill and confidence we enjoy on the land. We will either adapt to this reality or risk ceding the advantage to future enemies”.

CSA General Raymond T. Odierno

What is a Cyber Protection Team?

Cyber Protection Teams (CPTs) conduct global cyberspace operations to deter, disrupt, and defeat our adversary's cyber-space operations, and defend the United States through specialized Cyber support missions. Cyber Protection Teams consist of dedicated defensive operators, analysts, planners, and leaders who conduct operations to protect specified missions or national assets in and throughout cyberspace. Our teams are prepared to rapidly evaluate, and act in response to unexpected and dynamic cyber situations. The Protection Teams are prepared to defend our networks in response to hostile action and imminent cyber threats.
